

# Planning for Sustainable Transportation in the 21st Century Workshop

## March 23, 2010

1st Floor Transportation Council Room  
(Centerpoint II Bldg)

North Central Texas Council of Governments  
616 Six Flags Drive, Arlington, TX 76005-5888

Time: 8:30 AM – 4:30 PM (CST)

Learn How to Enhance Your Community through Sustainable/Livable Transportation Improvements

**Workshop Goals:** To develop a better understanding of how federal housing, environmental and transportation programs and policies can be used to support transportation investments that improve community sustainability and livability. Representatives of HUD, EPA, and DOT will be presenting overviews and examples of how their federal-aid grants and programs can build and enhance livable and sustainable communities and transportation systems.

**Workshop Outcomes:** Participants will be able to understand how HUD, EPA, and DOT programs and policies may be used to improve community livability and support sustainable development. Knowledge of key transportation-focused HUD, EPA, and DOT funding sources and contact information for program information will be shared. Participants will better understand the principal concepts and theories through real world examples of livability and sustainability.

**Sponsored by**

US Department of Transportation  
US Environmental Protection Agency

US Department of Housing and Urban Development  
Texas Transportation Institute
