

HOW to AMEND the STIP

- ✓ TIPs must be amended first, and, an MPO TIP must be approved by the Policy Board.
- ✓ TIP Public Involvement must be completed before submitting for a STIP revision.
- ✓ Amended projects in TIPs are updated within the eSTIP portal per schedule with all backup documentation uploaded as well.
- ✓ TPP reviews locked project within eSTIP portal. Once reviewed, TPP sets the revision in pending review status within portal. This flags FHWA / FTA that their review can begin.
- ✓ Amended STIP is posted on TxDOT's website, public hearing is posted in TxReg which begins the 30 day review for comment period. TPP holds public hearing approximately 15 days after posting.
- ✓ Once FHWA / FTA review has been complete, all project will appear in green as complete
- ✓ To receive federal action all projects **must be consistent** with MTP, UTP, and Environmental Documents.
- ✓ The next STIP revision can not be created within the eSTIP portal until the prior revision has been reviewed by FHWA / FTA and completed.
